Prateek Mogha

Senior Software Engineer | Java 17 | Spring Boot | Microservices | AWS | Kubernetes | Kafka

Edinburgh, United Kingdom | pmogha2008@gmail.com | linkedin.com/in/moghaprateek | github.com/moghaprateek

Currently in Edinburgh and open to senior backend engineering roles across the UK

PROFESSIONAL SUMMARY

Senior Java Engineer with over 10 years of experience designing, developing and supporting resilient backend and cloud-native systems across enterprise technology, payments, capital markets and automotive technology. Strong hands-on expertise in Java 17, Spring Boot, microservices, AWS, Kubernetes, Apache Kafka, REST APIs, event-driven architecture and distributed systems. Experienced across the full software development lifecycle, including architecture, implementation, automated testing, CI/CD, cloud infrastructure, security, observability and production troubleshooting. Delivered high-throughput payment systems handling approximately 200 TPS with a 99.9% SLA, reduced CI/CD deployment time by 50%, and improved vulnerability detection time by 35%.

CORE TECHNICAL SKILLS

Programming & Frameworks: Java 17, Spring Boot 3.5, Spring MVC, Spring Cloud, Spring Cloud OpenFeign, Spring Security, Spring Batch, Groovy

Backend Engineering: Microservices, REST APIs, OpenAPI/Swagger, Event-Driven Architecture, Distributed Systems, Asynchronous Processing, API Design

AWS: AWS CDK, Lambda, SQS, DynamoDB, Secrets Manager, STS, Lambda Powertools, CRaC/SnapStart

Cloud & Containers: AWS, Microsoft Azure, Kubernetes, Docker, Kaniko, Infrastructure as Code

Messaging: Apache Kafka, AWS SQS, Azure Service Bus

Security: Spring Security, OAuth 2.0, JWT, ForgeRock, Nimbus JOSE, RBAC, SSO, BouncyCastle

CI/CD & DevOps: GitLab CI/CD, Jenkins, Apache Maven, Docker, Kaniko, Checkstyle, Pre-commit Hooks

Testing: JUnit 5, Spock, Mockito, WireMock, MockMvc, JaCoCo, PIT Mutation Testing, TDD, BDD

Observability: Datadog, Micrometer, APM, Lambda Tracing, Structured JSON Logging

Engineering Practices: Agile, Scrum, Code Review, Technical Mentoring, Full SDLC

Payments & Compliance: RBI Payment Guidelines, FCA-Regulated Environments, GDPR, Payment Gateway Integration, Digital Banking

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Jaguar Land Rover

Manchester, UK | Sep 2022 – Present | Automotive Software & Connected Vehicle Technology

- Develop and maintain Spring Boot 3 microservices using Java 17, Spring Cloud OpenFeign and DynamoDB.
- Deploy containerised applications to Kubernetes using GitLab CI/CD and Kaniko.
- Design asynchronous event-driven solutions using Apache Kafka and AWS SQS for high-volume data streams.
- Develop AWS infrastructure using AWS CDK with Java; manage AWS Secrets Manager and STS configuration.
- Build AWS Lambda functions supporting JWT authorisation, ENI IP lookup and command proxying, applying Lambda Powertools and CRaC/SnapStart for serverless Java performance.
- Implement ForgeRock JWT validation using Nimbus JOSE and Spring Security filter chains.
- Build observability using Micrometer, Datadog, Feign metrics, Lambda tracing and structured JSON logging, including automated Slack and email alerts triggered at a 5% failure rate threshold.
- Integrate Snyk, Trivy, OWASP Dependency-Check and Semgrep into automated CI/CD security checks.
- Implement quality gates using Checkstyle, Spock, JUnit 5 and PIT mutation testing (100% mutation threshold, 80% coverage threshold).
- Mentor junior developers and take part in sprint planning, retrospectives and backlog refinement.

Java Developer – Bramfitt Technology Labs

London, UK | Feb 2022 – Sep 2022 | Software Security Testing & Developer Portals

- Designed and developed an event-driven vulnerability detection pipeline using Apache Kafka and Azure Service Bus.
- Reduced vulnerability detection time by 35% by triggering scans on code commits and processing results asynchronously.
- Developed Spring Boot and ReactJS role-based access functionality with database-level enforcement, including Single Sign-On (SSO) authentication and auditable access governance.
- Worked with Microsoft Azure in an Agile/Scrum environment.

Technical Lead – Mahindra Comviva

Gurugram, India | Apr 2020 – Jan 2021 | Payments & Digital Banking (Telecom Domain)

- Led backend engineering for the Airtel Money and Idea Money payment platforms serving millions of subscribers.
- Supported approximately 200 TPS and a 99.9% SLA under peak transactional loads.
- Worked within RBI payment system guidelines and telecom operator compliance rules governing transaction processing and customer data handling.
- Redesigned database schemas and implemented data partitioning to improve transactional performance.

- Reduced CI/CD deployment time by 50%, from 12 hours to 6 hours.
- Guided junior developers on day-to-day development and troubleshooting.

Consultant, Software Engineer – Genpact Headstrong Capital Markets
Noida, India | Dec 2018 – Apr 2020 | Healthcare Technology & Capital Markets

- Developed backend and UI components using Spring MVC for a US healthcare SaaS platform, covering patient billing, clinical user management and data operations under US healthcare compliance requirements.
- Supported a live capital markets trading application under high request volumes.
- Diagnosed production failures through root-cause analysis and delivered real-time defect fixes, eliminating trading downtime incidents.
- Collaborated with engineering, product and business stakeholders throughout the SDLC.

Technology Analyst – Infosys
Bhubaneswar, India | Oct 2017 – Aug 2018 | Insurance Domain

- Developed Spring Batch processing for insurance benefits and premium calculations across high-volume regulated datasets.
- Reduced manual regression testing by 28% through JUnit and Mockito automation integrated into Jenkins CI/CD.

Java Developer – Comviva
Gurugram, India | Jul 2015 – Oct 2017 | Telecom Domain

- Developed USSD payment applications for Airtel and Idea using Java Servlets, JSP and Spring; integrated SOAP and RESTful web services.
- Improved database query performance by 20%; increased automated test coverage to 85% and reduced production incidents by 26%.

EDUCATION & QUALIFICATIONS

MSc in Data Science — United Kingdom | 2022
B.Tech in Information Technology — Maharaja Surajmal Institute of Technology, Delhi, India | 2014
Diploma in Computer Science — Father Agnel Polytechnic, Delhi, India | 2011

PROFESSIONAL CERTIFICATIONS

- Microsoft Certified: Azure AI Fundamentals
- Microsoft Certified: Security, Compliance & Identity Fundamentals
- Spring Boot Microservices — LinkedIn Learning
- Learning Jenkins — LinkedIn Learning
